

AUTHORIZATION LETTER

Regarding Android Application: CryptoCalk (com.cryptocalk.calculator)

Date: March 31, 2026
To: Google Play Review Team, Google LLC
From: Konstantin Iakovlev — Owner & Developer of cryptocalk.com

1. Declaration of Ownership

I, **Konstantin Iakovlev**, hereby declare and confirm the following:

- I am the **sole owner, creator, and administrator** of the website **cryptocalk.com**, which has been live and actively maintained since November 2025.
- I am the **sole developer and publisher** of the Android application "**CryptoCalk: Crypto Calculator**" (package name: com.cryptocalk.calculator), published under the developer account "**Zainimaem.KZ**" on Google Play.
- **All content** displayed within the CryptoCalk Android application — including calculators, text, designs, code, and graphics — is **my original work**, created and maintained exclusively by me.
- The Android application uses **Capacitor (by Ionic)** as a framework to deliver the web application as a native Android experience. The website and the app share the same codebase because **I am the author of both**.

I **fully authorize** the use of all content from cryptocalk.com within the CryptoCalk Android application. There is no third-party content being redistributed without permission.

2. Evidence of Website Ownership

Evidence	Details
Domain registrant	Konstantin Iakovlev (verifiable via WHOIS for cryptocalk.com)
Hosting	Plesk panel at cloud-7.hoster.kz (89.35.125.22), account: Zainimaem.KZ
Source code	github.com/CryptoAgent666/cryptocalk — sole contributor
Google Search Console	cryptocalk.com verified under the same Google account as Play Console
Google Analytics	Property G-BVPMVV27NH for cryptocalk.com, same account

3. About the Application

CryptoCalk is a suite of **69 free cryptocurrency calculators** covering profit/loss, mining profitability, DCA simulation, tax estimation, staking rewards, and more. The application is:

- **Free** — no ads, no affiliate links, no data collection
- **Original** — all calculators and content developed from scratch by me
- **Multilingual** — available in 6 languages: English, Spanish, Portuguese, Turkish, Hindi, Russian
- **935 pages** of original content across all languages

The app is not a generic WebView wrapper or affiliate traffic driver. It is a **purpose-built calculator tool** that I developed from scratch. The web technology stack (Astro + React + Capacitor) is simply the technical approach I chose to deliver my original application on Android.

4. Signature

Signature: _____

Full name: **Konstantin Iakovlev**

Role: Owner & Developer, cryptocalk.com
